Email

If you provide us with your mobile number and email address, we'll let you know we have received your claim form.

Policy number

**PLEASE NOTE** that if any section of the form is not filled in, it may delay your claim - you MUST fill in sections A to E.

Please also read the following notes before submitting any claim and have your policy wording to hand for full details:

Your policy does NOT COVER in whole or as part of a claim:

- Any condition that started before the policy start date
- Any condition that started within the qualifying period of the policy start date
- The excess specified in your policy schedule
- Food
- Flea treatment
- Wormers
- Vaccinations

If a claim for a new condition please ensure the full medical history is attached to the claim form.

B. About your pet

Your pet's name (\* multiple)

\* If you have more than one pet insured with us, please ensure you enter the correct pet's name and only one claim form per pet.

Cat  Dog

Male  Female

Breed

Date of birth

Has your pet been neutered/spayed? Yes  No

What is the weight of your pet?  kgs

Note: If you are not sure about any of the above information, please ask your vet to complete this for you.

C. About your pet's condition

Name of condition as advised by your vet

Condition 1

Condition 2

Please tell us when you first noticed your pet was unwell or injured, that led you to make an appointment with your vet.

Time and date

Time and date

Did you contact our vetfone service? Yes  No

Was your pet under your care at the time of the illness/injury/incident? Yes  No

If no, please provide the name and address of any authorised third party looking after your pet at the time of the incident.

If your claim is for an injury, do you believe that another person was at fault? Yes  No

If so, please provide details separately.

D. Your previous veterinary practices (Please tell us all vet(s) where your pet was previously registered)

Practice name	Practice name	Please tell us your name and address at that time, if it was different to the name and address in Section A
Address	Address	
Postcode	Postcode	
Phone number	Phone number	
Date: from to	Date: from to	Postcode

E. Your signature (Policyholder - please complete one of the following boxes (a, b or c) to tell us who to pay)

I declare, to the best of my knowledge and belief, that all the information provided in this form is true and complete. I agree that RSA may seek any information it requires from any vet. I accept that the information provided may be released to other companies who provide a service to us or you in connection with managing and handling claims.

(I) Please pay my claim direct to me

10. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

11. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

12. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

13. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

14. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

15. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

16. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

17. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

18. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

19. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

20. Is the property used by family members only?  or holiday use?  (Please tick an appropriate box)

How to claim on more than pet insurance. How much does pet insurance go up if you claim. More than pet insurance how long to claim.

If your pet needs to see a different vet, they will help you choose one from our referral vet network. By using vets from our network you will avoid paying any additional excess costs. There's no need to worry; the clinicians at these practices are accredited in their chosen discipline by the Royal College of Veterinary Surgeons (RCVS) or European and American Boards. Your pet will be in good hands. If you need further advice about which referral vet to use, please call our Vet Referral Helpline on 0330 100 6445 before you make the appointment. If you have hearing or speech difficulties, you can use Relay UK with textphone by dialling 18001 followed by the phone number, or download the Relay UK app on your mobile or tablet. Last updated on 26 May 2022. The British are a nation of pet lovers, with millions of us owning one. We enjoy taking our dogs for walks and letting our cats patrol our neighbourhoods as well as watching our bunnies jump around in the garden with our kids. But pets are not cheap and not only do they need feeding and creature comforts such as toys and bedding, they also need to be looked after if they fall ill. And when an animal needs an operation, is injured or becomes unwell, it can be a very expensive business. Pet insurance might be able to help, but it's important to get the right cover. There is no 'one collar fits all' approach - the difference between a terrier, a bulldog and an eagle is vast, and so are the insurance policies to match. What is pet insurance? There are four main types of pet insurance: Accident only - this will only pay out in the event of an injury, not an illness, and is usually the cheapest type of cover. Time limited - this pays out for illness or injury, but only if treatment occurs within a set time frame (such as a year). There will also probably be a maximum payout, with you having to pay any extra above this amount. Maximum benefit - this will pay out at any time, but there is a maximum payment for each condition that you claim for over the duration of the policy. Lifetime - this is usually the most expensive cover, but also the most comprehensive. Your pet will be covered for life, but your premiums will probably increase each year. What does pet insurance usually cover? Pet insurance covers many of life's unexpected events, such as accidents, injuries or illnesses, which could otherwise prove costly. Generally, pet insurance covers the following: Vet fees - including the cost of X-rays, scans or operations that your pet may need. Third party liability - payouts to cover damage caused to property or people by your pet. Loss, theft or death of your pet. Advertising if your pet has gone missing, sometimes including money for a reward. Boarding cover - if you are in hospital for an extended period of time and cannot look after your pet, their care may be covered. Cover when you are abroad - some insurers will include this as standard, while others will add it on for an additional fee. It is important to check the details of your pet insurance quote, as this is only a general guide - specific policies might offer different cover as standard. What doesn't pet insurance usually cover? Many pet insurance policies have some conditions or situations which are not covered, so you will have to pay for these out of your own pocket. Common exclusions include: Pre-existing conditions that you knew your pet had before taking out insurance. Claims made in the first 14 days after taking out insurance. Routine care, including vaccinations and neutering. Pregnancy and any associated conditions. Certain breeds, including those mentioned in the Dangerous Dogs Act 1991, but this depends on your insurer so it is worth checking. Pets used for business purposes, such as breeding or security, will not usually be covered under standard pet insurance. You may need separate cover, such as breeders' insurance. What is more, your pet will usually have to be a certain age (around six to eight weeks old) before most insurers will cover them. » MORE: What is business pet insurance? Do I need pet insurance? Pet insurance is not a legal requirement for owning a pet in the UK. However, it can be reassuring to know that your pet's treatment is covered in the event of an accident, injury or illness. Whether or not you need or want pet insurance will depend on your personal circumstances. If you feel that you could afford the vets' fees if anything went wrong, you might not want to take out a policy for your pet. On the other hand, you might want the extra level of protection against the costs of illness and injury that pet insurance can provide. It is important to weigh up your options and consider their financial impact before you make a decision. How much is pet insurance in the UK? Pet insurance premiums in the UK cost an average of £271 a year in 2019, according to the Association of British Insurers (ABI). The cost of your premium will depend on many factors, including the type of animal you own, the age and breed of your pet, whether your pet has any pre-existing conditions, and the level of cover you require. Is pet insurance worth it? According to figures reported by the ABI the average single pet insurance claim in 2020 was worth £817. With vet fees likely to rise each year, it is important to think about whether you could afford to pay for treatment up front if your pet falls ill or has an accident. You might want to put some money aside each month in a separate savings account to use in the event of a pet emergency. But with no way of knowing how much your pet's treatment could cost, you may prefer to pay this money into an insurance policy that can cover larger claims if you do end up needing it. As with many of life's financial decisions, a lot rests on your personal circumstances - it's about making sure that whatever you do is suitable for your specific needs. What are the advantages of pet insurance? Pet insurance can pay out to help cover costly vets' fees if your cat, dog or another pet has an accident or becomes ill. It may take some of your worries away to know that your pet's mishaps will be covered, especially as vets' fees can rack up quickly. This is especially useful if your pet develops a long-term or chronic health condition after your policy has started. Managing these conditions can be costly over time if you are paying for medication and operations up front, so having pet insurance could help you save money. However, you may still need to pay for certain costs if you exceed the limits of your policy. Some pet insurance policies also offer money towards advertising if your pet goes missing. This means that you do not have to worry about finding the money to search for your pet, which could help to ease the burden of this stressful situation. What are the disadvantages of pet insurance? The cost of pet insurance can add up, which could leave you asking: is pet insurance really worth it? Over the course of a pet's lifetime, you could spend thousands on a policy that you don't end up using. Even a £25-a-month policy for a dog would equate to £3,600 over the space of 12 years. If that dog never falls ill or gets injured, then you'll have paid a lot of money into a premium that was unnecessary - but no one can predict the future. This is especially important to bear in mind with pre-existing conditions. If you cannot get these covered under an insurance policy, you will have to pay for any related treatment separately. In addition to your monthly premium, you might choose to 'self-insure' - saving the cost of a premium into a separate account each month for you to dip into as needed. However, pet insurance claim in 2020 was worth £817. With vet fees likely to rise each year, it is important to think about whether you could afford to pay for treatment up front if your pet falls ill or has an accident. You might want to put some money aside each month in a separate savings account to use in the event of a pet emergency. It may take some of your worries away to know that your pet's mishaps will be covered, especially as vets' fees can rack up quickly. This is especially useful if your pet develops a long-term or chronic health condition after your policy has started. Managing these conditions can be costly over time if you are paying for medication and operations up front, so having pet insurance could help you save money. However, you may still need to pay for certain costs if you exceed the limits of your policy. Some pet insurance policies also offer money towards advertising if your pet goes missing. This means that you do not have to worry about finding the money to search for your pet, which could help to ease the burden of this stressful situation. What are the disadvantages of pet insurance? The cost of pet insurance can add up, which could leave you asking: is pet insurance really worth it? Over the course of a pet's lifetime, you could spend thousands on a policy that you don't end up using. Even a £25-a-month policy for a dog would equate to £3,600 over the space of 12 years. If that dog never falls ill or gets injured, then you'll have paid a lot of money into a premium that was unnecessary - but no one can predict the future. This is especially important to bear in mind with pre-existing conditions. If you cannot get these covered under an insurance policy, you will have to pay for any related treatment separately. In addition to your monthly premium, you might choose to 'self-insure' - saving the cost of a premium into a separate account each month for you to dip into as needed. However, pet insurance claim in 2020 was worth £817. With vet fees likely to rise each year, it is important to think about whether you could afford to pay for treatment up front if your pet falls ill or has an accident. You might want to put some money aside each month in a separate savings account to use in the event of a pet emergency. But with no way of knowing how much your pet's treatment could cost, you may prefer to pay this money into an insurance policy that can cover larger claims if you do end up needing it. As with many of life's financial decisions, a lot rests on your personal circumstances - it's about making sure that whatever you do is suitable for your specific needs. What are the advantages of pet insurance? Pet insurance can pay out to help cover costly vets' fees if your cat, dog or another pet has an accident or becomes ill. It may take some of your worries away to know that your pet's mishaps will be covered, especially as vets' fees can rack up quickly. This is especially useful if your pet develops a long-term or chronic health condition after your policy has started. Managing these conditions can be costly over time if you are paying for medication and operations up front, so having pet insurance could help you save money.
